

Universal Well Management System

Universal Well Management System

Maximize your well production and profitability with real-time well site information. The Universal Well Management System is an easy-to-use, cost-effective software application that supplies you with vital operational data from your well sites – 24/7. And with total remote control, you can operate your gas, oil, and methane wells at peak performance – from anywhere in the world.

Gain Single-Source Control of Your Entire Production Field

Imagine knowing the exact operating conditions at every well – twice per second. Plus, having the ability to control your equipment – with the click of a button. Thanks to the Universal Well Management System, it's possible. Instantly know when your wells go down and respond in minutes. Remotely adjust your well control settings for optimum performance. Keep your employees focused on production efficiency and opportunities, not data collections.

Enhance and Accelerate Your Decision-Making

From flow rates and pressure readings, to well bore fluid levels and pump status, all of your operational data is conveniently delivered right to your fingers. Featuring an intuitive, user-friendly interface and point-and-click functionality, the Windows-based Universal Well Management System enables you to quickly and easily turn this data into actionable production intelligence. Now you can make better, faster decisions that help you maximize asset management.

Manage Your Production the Faster, Easier, Smarter Way

Are you still relying on expensive site visits to get your production data? How much does it cost you when a well goes down for a day or more? Let's face it. With rising operating costs and increased pressure to maximize production, now is the time to automate your well field. And the technology and talent at Universal Well Site Solutions makes it simple. Affordable pay-by-well packages, full training and support, easy-to-use software, industry expertise – you get all of this and more when you partner with Universal Well Site Solutions.

ONE METER FOR ALL YOUR GAS AND LIQUID METERING.

Technical Specifications

- Operating System: Microsoft® Windows® 2000 or better
- Processor: 1 GHz
- Storage: 40GB for up to XX number of wells
- Memory: XX MB RAM
- Internet: Broadband recommended
- Radio: 900MHz
- HSK bps data rate Server:
- Universal Well Management software, server key, and master radio
